Name _____ Date _____

What's your temperature?

What is your temperature?

Write your temperature here. My temperature is _____.

Ask your classmates

Name of Classmate	Temperature
1.	
2.	
3.	
4.	
5.	

_____ had the HIGHEST temperature.

_____ had the LOWEST Temperature.

Facts about Fahrenheit (F) and Celsius (C)

The United States uses Fahrenheit for temperature. Most countries use Celsius.

Here are some examples :

- Water freezes at **0 °C OR 32°F**
- Room temperature is **20 °C OR 68°F**
- Normal body temperature is **37 °C OR 98.6°F**
- A very hot day is **40 °C OR 104°F**
- Water boils at **100 °C OR 212°F**

How can you change the temperature?

$$^{\circ}\text{C} = (^{\circ}\text{F} - 32) \div 1.8$$

$$\text{For example: } (68^{\circ}\text{F} - 32) \div 1.8 = (36) \div 1.8 = 20^{\circ}\text{C}$$

$$^{\circ}\text{F} = (^{\circ}\text{C} \times 1.8) + 32$$

$$\text{For example: } (20^{\circ}\text{C} \times 1.8) + 32 = (36) + 32 = 68^{\circ}\text{F}$$
