Everyone needs a place to call home but many frail elderly people, or people with disabilities or with medical problems need a home with a caregiver who will provide some basic services:

- Home cooked meals
- A furnished bedroom
- Laundry and housekeeping
- Reminders of medicine, appointments, etc.
- In short, a “foster family” for adults.

To become a Family Home caregiver, consider:

- Do you have an extra room available?
- Would you like to provide care for someone in your home?
- Are you interested in operating a small business at home to earn extra income?

If the answers are yes, call (212) 331-3722 for an information package.

If you are seeking placement as a resident in a Family Home, please call (212) 331-3722 / 3351

If you would like to become a family home caregiver or if you or someone you know need placement as a resident in a family home, find out more at one of these information events provided by NYC Human Resources Administration.
